

A. Design NFA for the following Languages

1. Strings starts with a
2. strings ends with bba
3. Strings having substring bab

B. Design Mealy machine for following

1. Machine outputs x for string aba, y for abb otherwise z
2. Machine outputs 1 with strings ends with 1101
3. Machine to calculate 2's complement
4. Machine to outputs 1 when string length multiple of 3 otherwise 0

C. Design Moore machine for binary adder**D. Convert mealy machine to Moore Machine****E. Minimize the following DFA**

State	0	1
->q0	q1	q4
q1	q2	q5
q2	q3	q7
q3	q4	q7
q4	q5	q8
q5	q6	q1
q6	q7	q1
q7	q8	q2
*q8	q0	q4
